

from dream...

There is nothing quite like the look and feel of solid wood. The warm, subtle tones, the distinctive grain and unique character of any timber can be transformed into an exceptional example of furniture design when handled by a true craftsman.

In a world submerged in mass produced furniture, it is rare to find specialists who can create truly individual pieces that are superior in quality.

Using a wealth of materials, including timber sourced from ecologically managed forests, Auber craftsmen, with their creative design skill and expertise, endeavour to create inspirational, bespoke furniture that is unrivalled in today's marketplace.

Designer living needn't be a dream.
Let Auber make it a reality.

...to reality

No room is more indicative of our personal taste than our kitchen. The focal point of our home, our kitchen is where we spend most of our time - cooking, enjoying lengthy meals and conversations with family, entertaining friends or just relaxing over coffee. We want our kitchen to be an inviting place, a place to call home.

Auber manufactures furniture tailored to your specific needs and requests, incorporating any features or accessories you desire to make your kitchen a perfect representation of your individual taste and personality.

Choose from a diverse selection of timbers, ranging from European Oak to the exotic African Zebrano; a huge range of door styles and components, both traditional and contemporary; special or painted finishes; unique feature door designs (including our **Designer's Choice** range of carved frames); and clever storage options to make your kitchen a special, as well as a functional place. Once you have decided on your options, Auber will take care of the rest.

There is simply no
other kitchen like
an Auber kitchen.

contents

how to use this brochure

This brochure has been designed to make choosing your dream kitchen stress-free and enjoyable. Using our vast and wide-ranging experience, we have made a careful selection of timbers, finishes and feature doors for each style of door we have designed, making the process easier for you. So, all that is left to do is choose the combination you like and we'll take care of the rest.

The process is simple:

- 1 Choose a door design (if your choice is an In frame door, decide whether you want Standard fit or Easyfit).
- 2 Choose one of the timbers available to that door design (some doors are available in exotic timbers).
- 3 Choose a handle that suits the door (we have made some recommendations, but the choice is up to you).
- 4 Choose a painted or special finish to be applied to your chosen timber, if desired.
- 5 Choose one or more feature doors that are available to that door design (some feature door selections include a **Designer's Choice** carved door).
- 6 Choose any components you would like to include, to inject added individuality to your design.
- 7 Finish off by choosing wirework, storage and waste disposal units that will enhance the finished look and efficiency of your kitchen.

our special promise

Our aim is to provide a bespoke service that fulfills the exact specifications of our customers. If you have special requirements and do not see an example of what you are looking for in this brochure, please do not hesitate to mention this to your sales advisor as we always strive to comply with our customers' wishes.

finishes and exotic timbers

Auber offers a selection of finishes, exotic timbers and unique designer frames in its range. Look out for the following symbols:

painter's choice

If you see this symbol, it means that the featured door is available in a primed finish, ready for painting. Three different timbers can be purchased primed: white ash, character oak and tulipwood, with each one resulting in a different textured finish when painted. See full details on page 61.

designer's choice

Auber's range of designer carved frames will add the ultimate touch of individuality to whatever piece of furniture they are incorporated into. Available to a selection of door designs.

exotic

If you see this symbol, it means that the featured door is available in 8 exotic timbers, as well as the standard timbers listed on the page. For the full list of exotic timbers available, see page 60.

Auber offers the choice of having Easyfit applied to its In frame products. Information on Easyfit and how it works can be found in the Auber Price List and the Auber Application Guide.

AN antiqued finish

Certain timbers available in the Auber range can have a Special Finish applied, regardless of the door design.

FO french oak stain

Special Finishes refer to stains, tints, antiqued or rub through methods. Wherever you see the symbols (left), beneath a particular timber, means that finish is applicable to that timber.

AV avignon stain

CL classic stain

For further information and photographic examples of all Auber's Special Finishes, please see pages 61 and 62 in The Final Touch section of this brochure.

door designs

andorra

Simplicity at its best, Andorra's succinct design with minimal detailing creates a fresh and dramatic look that will appeal to all those who appreciate the pleasures of modern design.

The inclusion of feature doors and simple components such as those featured in the **Avant Garde Component Collection** will provide added finesse to this contemporary style door. Finish off the look with the **Avant Garde Mantle Shelf** (see example page 59).

exotic

champagne

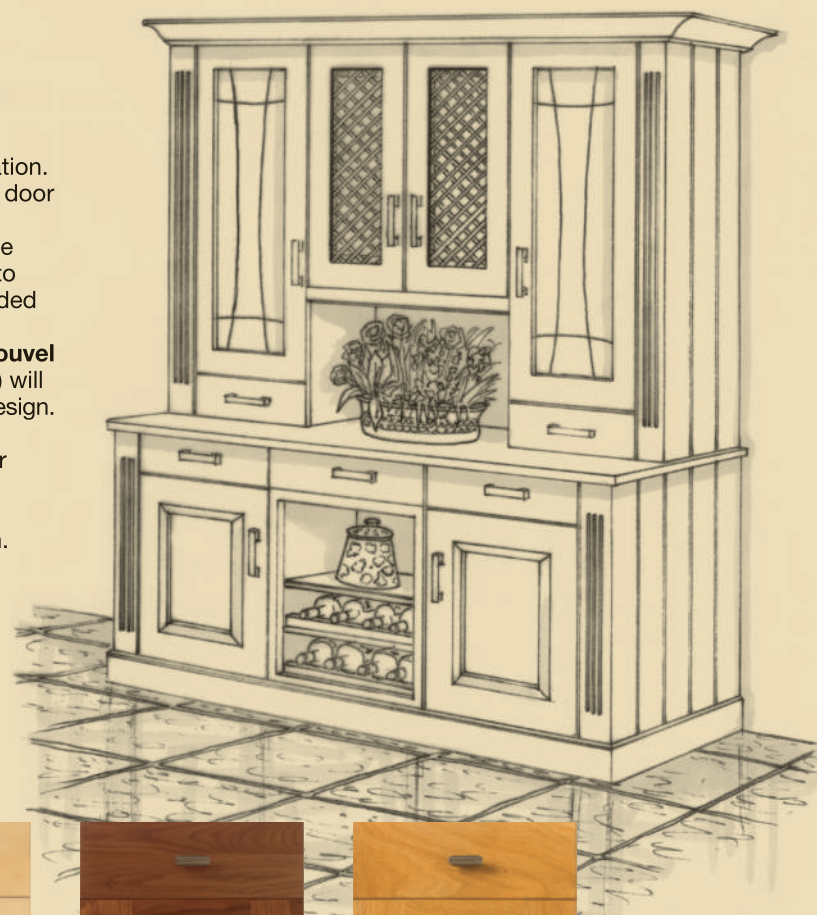

The Champagne door oozes contemporary style and sophistication. With its stepped centre panel, this door looks and feels chunky and solid, exuding sheer quality that will shine through and make you feel proud to own it. The accented appeal provided by the inclusion of the **Designer's Choice** Kiso carved frames and **Nouvel Overmantle** (example on page 59) will only serve to enhance the overall design.

Its versatile quality allows this door to be combined with a host of components that will result in a kitchen that is practical and stylish.

exotic

monaco

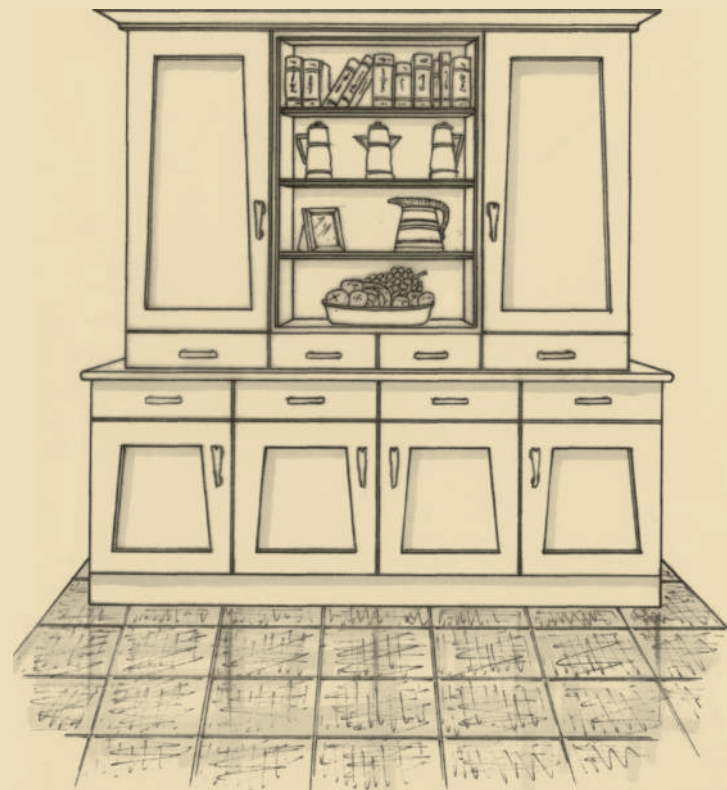

Monaco is hailed as Auber's most controversial design, with its bold tapered stiles challenging the linear standards set by the original, shaker-style door. Not a door to be ignored, Monaco is best displayed using darker timbers if 'high impact' is what you desire.

A minimal selection of feature doors is available, to allow Monaco to speak for itself. Added components are best kept simple and handles chosen carefully so that they integrate well with the door's unique design.

painter's choice

normandy

The authentic nature of Normandy's framed, tongue & groove panelled design will feel right at home in a country kitchen. Once again, a **Painter's Choice**, Normandy is rustic and robust and works beautifully when combining painted and natural timber finishes. Antiquing also works very well on this door, creating the classic 'aged' look and feel, with a painted finish creating a more modern feel.

The introduction of **Base Twist Posts** will further enhance the overall appeal of this door.

exotic

riviera

A nod in the direction of modern Irish design, Riviera's quintessential celtic, woven structure provides an incomparable addition to the Auber portfolio. The drawerfront also features the woven design element, keeping in line with the door. With its dubbed down corners and prominent v-groove, Riviera is an excellent example of sophistication brought on by simple design.

The **Nouvel Component Collection** and **Orion Mantle Shelf** (see example page 59) sit very comfortably with this door.

exotic

sabin

The traditional overtones achieved with a Sabin door are emphatically enhanced when contained within an In frame setting. The frame with cockbead sets off the glorious raised centre panel to fabulous effect, resulting in an ornate design that will inspire and delight you.

This door deserves the best and no less than the finest traditional components will suffice. **The Classic Overmantle** accompanied by the **Classic Component Collection** is the ideal choice.

The final
touch

components

Choosing components to integrate into your kitchen design is your chance to display your own unique taste as well as providing a functional element to the design.

Auber's incomparable selection of components provide function and form in all shapes and sizes with choice for the traditionalists, the modernists and anyone in between.

Whether you are striving to inject an ornate feel into your design with the inclusion of decorative fluted pilasters, renaissance corbals and the magnificent Classic Overmantle, or prefer to maintain a clean simplicity with the use of the Nouvel Component Collection, the result will always be stunning and original.

An Auber craftsman's largest source of satisfaction comes from creating beautiful furniture that can be utilised for years to come, taking pride of place in someone's home. The inclusion of open shelving, wine rack, plate rack or spice box units will ensure that your kitchen is not only beautiful to look at, but can be used to its full potential.

- 1 spice box display unit with drawers
- 2 open display unit
- 3 plate rack display unit with plate rack
- 4 wine rack display unit with wine rack rail
- 5 rococo fluted decorative pilaster, featuring additional rococo corbal
- 6 romantic chamfered decorative pilaster
- 7 auber fluted decorative pilasters, shown singly, as a duo and as a trio

mantle shelf & pilasters

Auber Mantle Shelf & Pilasters

The Auber Mantle Shelf & Pilasters (pictured here) utilise classic design features including castellated rail and fluted pilasters. The pilasters can be joined together in groups of two, three or four to create a wider vertical on either side, whilst the castellated rail is topped off by a beaded cornice, adding character and sophistication.

mantle shelves

Renaissance Mantle Shelf

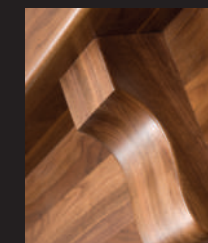

The perfect example of how something can be beautiful yet serviceable, the Renaissance Mantle Shelf provides a handy display area at the top whilst adorning the wall breast around the cooker with magnificent carved features including Renaissance and Romantic corbals and a castellated rail. Cooking will never feel the same!

Either side of the mantle shelf appears **Designer's Choice** Gothic carved frames for that perfect finishing touch.

Classic Mantle Shelf

The Classic Mantle Shelf, shown here flanked by **Designer's Choice** Damascus Carved Frames, uses ornately styled components such as beaded cornice and light pelmet to accentuate the grand features of its beautifully designed structure.

Orion Mantle Shelf

A entirely unique design, the Orion Mantle Shelf is definitely not for the faint hearted! Characterised by its finely crafted fingers of timber, the Orion is a modern masterpiece for those who appreciate progressive design at its finest. Shown here combined with **Designer's Choice** Gothic Carved Frames.

Nouvel Mantle Shelf

The Nouvel Mantle Shelf's chunky, solid design is reinforced by the use of simple, Nouvel corbals and curved cornice and pelmet, resulting in a versatile shelf that will suit both traditional and contemporary environments. Shown here along with **Designer's Choice** Celtic Carved Frames.

Avant Garde Mantle Shelf

The Avant Garde Mantle Shelf creates a breath of fresh air with its simple, sophisticated style and elegance, created by the use of a plain cornice and pelmet and curvy corbals. It is set off particularly well with the integration of the **Designer's Choice** Kiso Carved Frames.

a cut above - exotic timbers

The ultimate indulgence and every customer's dream, furniture crafted from exotic timber will take your room from 'average' to 'spectacular' in an instant. Our carefully selected range of exotic timbers provides our customers with the choice to own furniture that is truly original with uncompromising quality.

Whether you decide to commission a dresser fashioned from robust African Wenge with its rich, dark colour and black veining or an entire kitchen made lovingly from Sweet Spanish Chestnut with its pale brown mix of straight and spiralled graining, you can be sure that you will be the only one in the neighbourhood with anything like it.

As with all things that are worth having, furniture produced from exotic timber takes time. As well as the fact that the timber comes from all parts of the globe, the very nature of some of these timbers will mean they require extra time to be crafted. The result, however, is most decidedly worth waiting for.

Hickory

Sweet Spanish Chestnut

Painted finishes

The added touch of a painted finish can alter the look and feel of a room dramatically. Whether you decide to mix and match different colours in the same room, use a single colour throughout or opt for the beautiful combination of painted timber mixed with naturally finished timber, the result will always be breathtaking.

Auber's service is versatile, designed to suit your exact requirements when it comes to painted furniture. We offer three different timbers sold with a primed finish, ready for painting.

Each timber produces a very different result when painted, with a texture to suit all tastes.

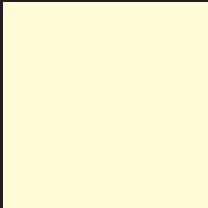

Character oak unfilled with its visible knots, cracks, splits and wood grain will result in an 'aged' look, like it's always been there. A more subtle, but also effective option is **White ash** or **Character oak filled** with only the wood grain visible when painted. **Tulipwood**, at the opposite end of the spectrum, will result in a perfectly smooth, uniform finish. For a further touch of character, why not incorporate a rub through

finish to your painted kitchen? Rub through is available for character oak only, producing added appeal with its 'worn' appearance.

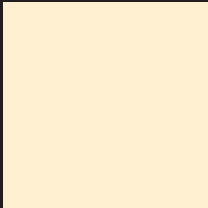

When it comes to painting your kitchen, either we can paint it for you, in any of our fifteen complementary colour options (see below), or alternatively you may choose to buy your doors and accessories primed and have them painted by a painter of your choice.

Please note: Because timber is a natural living product, it is prone to movement when exposed to adverse temperatures. High levels of moisture in the air caused by humidity can cause door expansion, whilst colder air can result in panel shrinkage. When painted doors are affected by these conditions it may result in the appearance of hairline cracks along the joints. For those who wish to diminish the possibility of this scenario, we have constructed a range of doors that limit the risk of hairline cracks appearing. These doors are marked **Painter's Choice**. For best results when installing painted products, the temperature during installation should be 22°C with 50% humidity.

special finishes

Another way to embellish your timber is with a special finish. At Auber, we class stains, tints and antiquing methods as ‘special finishes’, each with its own unique characteristics.

Create an ‘aged’ or ‘worn’ appearance with antiquing. Antiquing will add emphasis to the joints where timber meets timber, forming dark crevices that instantly transform a new piece of furniture into an antique. So, if you cannot locate the ideal piece when searching through antique shops, fear not, we will create it for you and nobody will know the difference! Antiquing is available on character oak, white oak, pine and white ash.

Add warmth to gorgeous cherrywood with a tinted finish. Tinting deepens the already rich colour of cherry, providing a stunning result for all lovers of this premium quality timber.

Our final option is staining. Staining subtly alters the existing colour of the timber, enriching it with warm tones and enhancing it with a touch of luxurious colour. An ideal choice for those who want to add richness, yet maintain the true integrity of their timber. Staining is available on character oak and pine.

wirework & storage

Not just used for reasons of practicality and efficiency, the wirework and storage options offered by Auber can also create an added, if unexpected, aesthetic dimension to your kitchen design. Just because something is practical doesn't mean it can't be beautiful!

When you go to grab the olive oil you no longer have to reach up, knocking over jars and bottles to get what you want at the back of the cupboard. You simply pull gently on your pull-out larder, which glides open to display wire racks stacked with all your goods neatly arranged and easily accessed, with no fear of guests catching a glimpse of disorganised cupboards.

Internal wire pull-out baskets and/or magic corner solutions also provide easy access, particularly inside base cupboards, dispensing with the need to get down on your hands and knees to get at the smoothie maker!

Cutlery inserts and plate holders keep cooking utensils and crockery organised and drawer partitions allow for food storage and separation, making it easy to find everything you want, when you want it.

lighting

Lighting is a vital element of any kitchen environment, whether it is for ambient use, focusing on special features or purely for decorative purposes.

Lighting has incredible visual impact, and can be used to highlight certain areas that you feel deserve special attention, for practical reasons such as being able to see clearly when preparing and cooking food or simply to create an ambience or mood in a room.

Auber's diverse selection of lighting options from downlights and spotlights to shelf and wall lighting, will enable you to accentuate all the areas you want to in your kitchen, on all levels, from the toespace to the top of the cabinets. A worthy investment for those wanting to maximise the look of their kitchen.

waste disposal

Something we don't usually think about until after our kitchen is installed, specially adapted waste disposal units can make all the difference to how we operate in our kitchen.

All Auber's waste disposal units are compartmentalised for manageable recycling and removable to make cleaning an easy job. Made to disappear behind a cupboard or drawerfront, all bins are easily accessed without being conspicuous.

the last detail

We have tried to do justice to Auber's craftsmen by using illustrations and photography that represent their handcrafted furniture in the most realistic and appealing way possible. Nothing, however, can replace the experience of seeing the finished product for yourself in order to appreciate the fine detail and creative skill that goes into producing each and every Auber product.

Whichever piece of furniture you decide to purchase, from a simple dresser to a full kitchen, you can be sure that you are purchasing a product of superior quality, that is outstanding and original.
