SENSING THE DIFFERENCE

Intelligent
appliances
to *make your life*
more efficient *and*
pleasurable.

INTRODUCTION

Intelligent appliances to make your life more efficient and pleasurable. In under 18 years, Whirlpool has become the number 1 household appliances brand in Europe. This is a success born out of relentless research and innovation, consistently producing industry leading design and functionality solutions to better meet your changing needs. New design trends, technological advances, evolutions in society and changes in domestic behaviour have all inspired our innovations. With every step has come greater simplicity, adaptability and durability. This produced cleaner, more attractive styling and more sophisticated and responsive functionality. The result is stylish appliances with the intelligence to do much of the work for you, radically simplifying your existence. **Whirlpool. Sensing the difference.**

WHIRLPOOL'S BUILT-IN INNOVATION

Like everything Whirlpool manufactures, its Built-in products are designed to adapt to your lifestyle, providing you with the elements to create your ideal kitchen whatever your specific operational and space requirements. Characterised by elegant, ergonomic design and attractive, high quality materials, the range offers a variety of shapes, sizes and

aesthetics, all containing intelligent functionality that keeps pace with your needs as they arise: Whirlpool's patented 6th Sense® technology and other intelligent innovations such as text assisted displays take care of the details, leaving you free to get on with your life.

WHIRLPOOL SUPPORTS GREAT RESULTS!

Whirlpool 6TH SENSE is all about achieving great results. That's why we support women who use their 6TH SENSE, either at home every day, on a tennis court or making a difference in their community.

For the 5th consecutive year, Whirlpool is the Premier Sponsor of the Women's professional tennis Tour in Europe, celebrating women players and the great results they achieve. A partnership of champions!

Since 1999, Whirlpool is strongly committed to supporting Habitat for Humanity, an association that makes a real difference to the community, ensuring that hundreds of thousands of people live in decent housing conditions.

Whirlpool, Premier sponsor of the Tour

Great results require a 6TH SENSE® - on court...

Control, precision, sensitivity and responsiveness...
The stars of the Tour rely on their special sense of intuition to achieve success on court.

... and off court!

Whirlpool 6TH SENSE® range does the thinking for you. Advanced technology senses, adapts and controls to deliver great results, with a minimum of effort and energy. Making your life easier, every day.

Whirlpool and the players from the Sony Ericsson WTA tour rely on their 6TH SENSE® to achieve extraordinary performances!

WHIRLPOOL 6TH SENSE. ON COURT WITH THE CHAMPIONS.

Whirlpool supporting Habitat building the foundations for a better future

At Whirlpool, we are strongly committed to expanding and growing our support of Habitat for Humanity. The international charity has given hope to some of the world's poorest people, it has helped to build communities in some of the world's most deprived areas and it has given families the chance of a safer, more financially secure future.

Whirlpool is proud of being involved with Habitat for Humanity. We believe this Organisation does make a difference for families. We work in partnership with Habitat for Humanity to support their initiatives on-the-ground by donating products, providing manpower support for building projects and by raising awareness of the Organisation through our sponsorship of the Women's Professional Tennis Tour. We also use our association with women's tennis and its top players to raise money for the Organisation.

Since 2004, Whirlpool Europe has become the largest global partner of Habitat for Humanity. During this time we have achieved a lot. But there is still a lot to do.

For more information on Habitat for Humanity, please go to www.habitateurope.org

THE ULTIMATE DESIGN IN MODULARITY

Premium Range

Whirlpool's **Premium Range** of ovens, microwaves, hobs, hoods, dishwashers, fridges and freezers is the ultimate in functional luxury. High quality materials such as stainless steel and glass combine together, offering numerous innovative functions and features to make every aspect of your kitchen activity more pleasurable and efficient, from food preparation to cleaning, to energy saving.

DESIGN WITH A SENSE OF DIFFERENCE

Essence Range

The elements of the new **Essence** built-in line are designed to combine style and performance into the limited space of a modern kitchen. Simplicity of use is the leading principle behind the concept of **Essence Range**, but also elegance and an integrated feel of simple, rational forms. Today's real luxury is the optimization of space and time, and this has never been

more true than in the kitchen. The **Essence Range** not only solves the challenging equation of managing facility of use and rapidity, it adds a dimension of timeless class through its sophisticated design and the use of the latest technology.

Linear Range

Designed to fit cleanly and seamlessly into any kitchen style, the **Linear Range** ovens, microwaves, hobs, hoods, dishwashers, fridges and freezers also combine to create an environment of rational, understated simplicity. The governing concept is reduction to the essentials, resulting in uncluttered, ergonomically direct functionality

and design. Simplicity of use is underpinned by sophisticated technology, precisely engineered to take care of many of the processes you would previously have had to monitor, giving you the freedom and flexibility to live life as you please.

INNOVATIVE, FLEXIBLE, EXCLUSIVE

Gallery Collection

Give space to your creativity, and enjoy a clever way to think about your kitchen. Modular appliances from the Gallery line make your kitchen the ideal space to experiment, create and express your own needs and desires; a place inspired by the latest design trends and where high performance demand easily meets space-saving needs. Pure shapes, high quality materials and extensive use of advanced technology create an exclusive, new concept of kitchen. Remember that all ovens, except the traditional oven, are 46 cm high and perfectly combine with the warming and accessory drawers, fitting the space of a standard 60 cm oven cavity.

GIVE SPACE TO YOUR CREATIVITY

Choose your favourite appliances, according to your space needs and your cooking preferences.

CHOICE, FLEXIBILITY and PERFECT ALIGNMENT...

The Whirlpool 'Gallery' style built-in appliance range includes 60cm high and 46cm high models. If your particular model selection includes both these dimensions you can ensure perfect alignment and a neat 'designer' look by simply adding the 14cm

deep Warming Drawer beneath each of your chosen 46cm models. To enable you to choose an oven that exactly meets your needs, the range includes five 60cm Single Ovens offering a wide range of cooking possibilities.

AKZ 810 6th Sense® STEAM OVEN

AKZ 803 6th Sense® MULTIFUNCTION OVEN

AKZ 555 PYROLYTIC OVEN

AKZ 550 MULTIFUNCTION OVEN

There is also a Speed Oven which cooks 50% faster than a conventional oven, an Automatic Coffee Maker that dispenses real 'Espresso' coffee (and hot water for tea or other beverages) and a Combi Microwave Oven with innovative

'6th Sense®' Intelligent Sensor 'Crisp', 'Steam' and 'Jet Defrost' options. Finally, the Warming Drawer will keep up to six place settings of crockery warm (between 35° and 85°C).

SENSING THE DIFFERENCE

INTELLIGENT
OVENS
THAT MAKE
PERFECT
COOKING EASY

INTELLIGENT OVENS THAT MAKE PERFECT COOKING EASY

Whirlpool's stylish built-in ovens offer as much control or as much help as you need, with labour saving, intelligent technology and simple controls framed by clean, geometric lines. You can enjoy all the possibilities offered by traditional multifunction ovens, with a wide variety of cooking methods, or discover what 6TH SENSE® technology can do for you with the new steam assisted oven and 6TH SENSE® oven.

Steam Assisted Oven

Whirlpool has created the most advanced appliance yet for your kitchen: a new multi-function oven that combines the power of steam with unique 6TH SENSE® technology. Steam is the ultimate cooking method for all your food, providing tasty, tender and juicy dishes for you to enjoy.

Whirlpool's unique 6TH SENSE® technology manages the steam-assisted cooking process for you, injecting the right amount of steam at the right time. Cooking time is reduced by between 10% and 35% depending on the food category: meat, fish, poultry, stuffed vegetables or bakery.

You can also use the natural power of steam to keep your food warm or reheat it, maintaining its original texture and taste just as if it was freshly cooked.

With its special sensors, 6TH SENSE® technology maintains the ideal temperature inside the oven. Thanks to the unique boiler temperature sensor the oven generates the right amount of steam in the cavity at the right time. It also constantly tracks the water level, reminding you to refill it.

The front panel includes the ergonomic "push push" water filler drawer, while the Jet Menu touch control and text-assisted display provides constant feedback during the setting phase and throughout the cooking cycle.

Moreover, if you choose not to use the 6TH SENSE® Steam function, you can enjoy all the possibilities offered by a traditional multi-function oven with a wide variety of cooking methods such as: Maxi cooking, Rapid pre-heat, Conventional cooking, Pastry, Extra browning and so on... Simply choose a program and set the time and temperature required for the dish you are cooking.

OVENS

INTELLIGENT OVENS THAT MAKE PERFECT COOKING EASY

A 6TH SENSE® for great results

In addition to the wide range of programmes available on multi-function ovens, Whirlpool has now added the innovative 6TH SENSE® function, offering perfect cooking results with no fuss. Thanks to its two sensors, 6TH SENSE® technology, is able to sense the weight of the food* that is being cooked and the precise temperature inside the cavity, adapting the cooking time and controlling the cooking process accordingly, giving regular feedback on cooking time thanks to the innovative and user-friendly touch control display.

Cooking with Whirlpool's 6TH SENSE® oven is like having a professional Chef in your kitchen, looking after the details to ensure perfect results every time.

6TH SENSE® menu: simply select one of the twenty five 6TH SENSE® recipes and the oven will automatically sense the weight of the food* and set the right cooking function, time and temperature for perfect results, every time.

6TH SENSE® recipes cover 25 popular hits:

Savoury dishes

Lasagne - aubergines gratin - pizza - two pizzas - quiche lorraine - vegetarian pie.

Meat and fish

Roast chicken - chicken breasts - pork chops - kebabs - shank of pork - leg of lamb - sea-bass with fennel

Vegetables

Roast potatoes - tomato and courgette gratin - potatoes gratin vegetables gratin - stuffed tomatoes.

Desserts

Pear cake - marble cake - fruit tart - strudel - apple pie - chocolate and nut cake - almond biscuits.

Manual mode

Lets you set the cooking time and oventemperature details yourself. The oven will suggest the most suitable level where to place the shelf.

* meat, fish or vegetables

Speed Oven

Cook like you always have with your traditional oven, in half the time. The Speed Oven is a space-saving appliance based on traditional cooking technology, but with the added boost of microwaves when and if needed, all in one product.

This can save you up to 50% in cooking time, depending on the recipe. It also features "Jet Menu", the text assisted display. Amongst further features the multi level cooking on 3 different levels and a speed defrost function for faster defrosting. The 40L cavity of the Speed Oven is enamelled for easy cleaning. The Speed Oven can be combined with a warming or accessory drawer to fit perfectly into a 60cm cavity.

Part of the Gallery Collection, it elegantly matches the Essence and Progressive Line appliances.

Warming Drawers

The warming drawers are the perfect solution to heat plates, cups and utensils, so that your meal is always served at the best temperature. They can also be used to keep your cooked food warm prior to serving.

The warming drawer reaches a temperature of 40° to 80° thanks to a fan heating element controlled by an electronic thermostat. It easily accommodates loads of up to 25kg, but its compact dimensions - 14cm in height - are ideal for it to be fitted in a traditional oven cavity in combination with one of the Gallery Collection appliances (microwave oven, coffee machine or speed oven).

The warming drawer perfectly matches the Premium range aesthetics.

Accessory Drawers

The accessory drawer, perfect to store cutlery and tools for your kitchen, elegantly matches the Premium range aesthetics. Its 14cm height allows you to fit it perfectly in a 60cm space, in combination with one of the Gallery Collection appliances (microwave oven, coffee machine or speed oven).

Easy Clean Treatment

The latest technology applied to the care of stainless steel so that grease, fingerprints and dust are easily removed.

This special treatment preserves your appliances from scratches and from the effects of ageing on stainless steel, making them always look perfect.

VARIETY MEETS THE PLEASURE OF COOKING

Jet Menu user interface

Whirlpool believes in variety and fun in the kitchen. The more options there are to experiment with, the more pleasurable it is for both cooks and diners. That's why we've created the Jet Menu programmer. It gives you total freedom to experiment with a range of pre-programmed recipes and special functions such as Fast Pre-heat Maxi cooking for perfect results on large cuts of meat. Use it in combination with our new set of accessories for a healthy, tasty and endlessly varied cooking experience.

15 automatic recipes

Jet Menu comes with 15 pre-set recipes, so you can create and experiment with utter ease and efficiency. There are 5 fixed recipe types making it easy to cook dishes such as pizza, roast beef or quiche and 10 more recipes preset according to which language setting you're using. By changing the language setting, you can also have access to the recipe set of other countries.

Function, time and temperature for each recipe have been pre-programmed to give optimal results every time. Some

recipes are 'auto-boosted', which means the oven preheats automatically and the display tells you when to put food in and on what level.

Maxi Cooking

Whirlpool's Maxi Cooking function controls and balances the top and bottom heating elements to allow the oven to heat up more gradually and smoothly, giving you the greater control and delicacy needed for large cuts of meat that would otherwise be difficult to cook. The result is succulent, tender meat, thoroughly heated through on the inside, perfectly crisped on the outside.

Fast Pre - Heat

Whirlpool's pre-heat function quickly heats up the oven to the optimal temperature for whatever dish you're cooking 20% faster than a non boosted oven. A buzzer alerts you when it's time to put food in.

Pyro indicator: the best guidance for cleaning

With the Pyro indicator, the oven automatically counts the number of cooking cycles, the type of recipe selected and

their likeliness to leave dirt to give you an indication of when you should run a pyro. It initially suggests an express pyro of 75 minutes and you can run this or keep using the oven. If you don't take up the first suggestion it automatically waits until you're ready for a full pyro of 3 hours before alerting you again.

Aqua Clean Cycle

Aqua Clean prepares the oven for cleaning by heating water inside the cavity so dirt becomes soft, loose and easy to wipe away. You'll be alerted both on the display and with a buzzer when the cavity's ready to be cleaned.

I-Cook

The new I-Cook User Interface offers flexibility of use, including functions such as preset temperatures and extended cooking features to keep your food warm, give you extra grilling power and total precision through electronic controls.

GRILLS

Grilling adds another dimension to your cooking. Use it to add colour or as a cooking method in its own right. Whirlpool ovens are available with a variety of different grills...

Tilt down grill

Easy cleaning. These grills can be lowered to allow access to the oven roof for easy cleaning.

Single variable grill

Adjustable. Single variable grills have one grilling zone and the heat level is adjustable giving you more control of your grilling.

Dual zone grill

Two grilling zones gives you the flexibility to use one or both according to the size of the food to be grilled and enables you to cook small portions economically.

Turbo grill

Closed door fan grilling. Grills faster and more evenly by boosting hot air around the grill zone. Ideal for grilling thicker pieces of meat. Gives cooking a 'spit roast' effect, crisp on the outside and succulent inside.

Fixed grill

Single zone. Fixed grills have just one grilling zone with one pre-set heat level.

OVENS

ADVANCED FUNCTIONS FOR EXCELLENT PERFORMANCE

Multi-function cooking

Whirlpool multi-function ovens offer the flexibility of a wide variety of cooking methods that can be used to cook different food types to perfection. The main cooking functions are detailed below and the symbols will help you make choices when you refer to the individual product pages.

6TH SENSE® Steam Function

Steam-assisted cooking allows you to cook many kinds of dishes in an inspired new way, improving tenderness and guaranteeing juicy and tasty results every time. There are 5 different food categories to choose from: meat, fish, poultry, stuffed vegetables or bakery.

Maxi Cooking

Whirlpool's **Maxi Cooking** function controls and balances the top and bottom heating elements to allow the oven to heat up more gradually and smoothly, giving you the greater control and delicacy needed for large cuts of meat that would otherwise be difficult to cook.

Fast Pre - Heat

Whirlpool's pre-heat function quickly heats up the oven to the optimal temperature for whatever dish you're cooking 20% faster than a non boosted oven. A buzzer alerts you when it's time to put food in.

JET Menu

15 pre-set recipes: 5 fixed recipe types and 10 more pre-set recipes according to which language setting you're using. Function, time and temperature for each recipe have been pre programmed to give optimal results every time.

6th Sense® Menu

25 6th sense® pre-set recipes.

Steam Clean Cycle

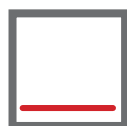

Incorporates 2 functions. Facilitates oven cleaning and indicates when oven descaling is necessary.

Aqua Clean Cycle

Aqua Clean prepares the oven for cleaning by heating water inside the cavity so dirt becomes soft, loose and easy to wipe away.

Bottom heat

Bottom heat only ideal for use at the end of a cooking cycle to brown the base of food.

Top heat

Top heat Ideal for crisping at the end of a cooking cycle.

Conventional cooking

Combines top & bottom heating to provide a traditional cooking method with the oven hotter at the top. Ideal where a crisp finish is required or for slowly cooking casseroles.

Defrost

Fan only (without heat) A fan at the back of the oven circulates air evenly around frozen food to minimise defrosting times.

Special functions

Low temperature programme incorporates two temperature options. A 35°C setting for dough proving and a 60°C 'keep warm' setting. Jet menu models also include a defrosting setting which operates the fan without heat.

Keep warm option

Keep warm can be selected to activate automatically at the end of a cooking programme. Keeps food warm (but not dried out) for up to 4hrs.

Pastry Option

Pastry function Fan assisted cooking with heat from top and bottom elements. Ideal for cooking biscuits and cakes.

Turbo Grill

Fan grilling with the door closed. Grills faster and more evenly by boosting hot air around the grill zone. Ideal for grilling thicker pieces of meat. Gives cooking a 'spit roast' effect, crisp on the outside and succulent inside.

Grills

Grills Whirlpool ovens come with one of a number of different available grill models. See page 28 for descriptions and individual product pages for the type of grill fitted.

Grill & Turnspit

Grill & Turnspit Ideal for ensuring that large meat or poultry roasts are cooked right through. The turning action helps retain natural juices and flavour.

Extra Browning

Extra browning Can be programmed to operate automatically at the end of a cooking programme to give the desired level of browning. Three settings are available.

Circa-fan cooking system

"Circa-fan" forced air cooking. A fan behind the back wall of the oven forces air through heating elements and into the oven from FOUR directions. Food is cooked quickly (pre-heating is normally unnecessary) and evenly in all parts of the oven. Different foods can be cooked simultaneously without mixing taste or smell.

Pizza/Bread Programme

Pizza/bread programme Developed with the aid of top chefs, the Pizza/Bread programme gives you a choice of tailor made cooking options.

Energy Efficient

Whirlpool ovens are super insulated to retain heat, save energy and reduce cooking times. Look for the A 'Energy Class' rating symbols.

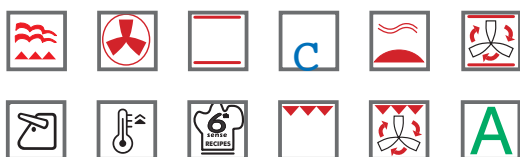

AKZ 810

6th Sense® Multi Function Steam Oven

Key features

- 6th Sense® combined steam cooking functions
- Multifunction cooking with electronic temperature control
- 6th Sense® 'Jet Menu' offering 25 pre-programmed recipes
- Full manual control
- Single variable tilt down grill
- Turbo grill

ENJOY YOUR FAVOURITE ITALIAN ESPRESSO

Fully Automatic Coffee Machine

This fully automatic coffee machine makes perfect tasting, intensely flavoured, real Italian espresso and creamy cappuccino thanks to the double thermoblock system and the optimal water pressure. Its compact dimensions (46cm in height) make it ideal to combine with a warming drawer of the Gallery Collection fitting a traditional oven space in your kitchen. The brewing unit is removable allowing easy and perfect cleaning. The water tank and drip tray are accessible from the front and there are separate containers for coffee beans and pre-ground coffee. Easy to use, the machine lets you set the display to your own language and you can also personalise your settings: “strength” of coffee, temperature and other parameters.

The aesthetics match that of the Premium products. A great looking appliance, in tune with the latest kitchen trends.

Mini Bi Coffee Machine

Whirlpool’s semi-automatic mini-BI coffee machine makes fully flavoured espresso thanks to its thermoblock system. The water tank and drip tray are accessible from the front and are easy to clean. The mini-BI coffee machine offers you flexibility in installation, either in a column or in the upper cupboard, and its new flat design with stylish lighting, in line with the latest kitchen trends, perfectly matches the rest of your BI appliances

AUTO COFFEE MAKER

ACE 100

Fully automatic coffee maker

Key features

- Fully automatic "Bean to Cup" coffee maker
- Thermoblock heating - 15 bar pump pressure
- Personal settings can be stored
- Auto start mode
- Adjustable coffee strength and temperature settings
- Option of using beans or ground coffee
- Milk steamer nozzle
- Drip tray accessible from the front
- 1.8 litre water tank accessible from the front
- Water filter
- Anti fingerprint stainless steel

Colour available: stainless steel

ACE 010

Semi automatic coffee maker

Key features

- Espresso and cappuccino options
- Thermoblock heating - 15 bar pump pressure
- Can be built into wall cupboard
- 1.5 litre tank capacity accessible from the front
- Separate steam boiler
- Milk steamer nozzle
- Drip tray accessible from the front
- Halogen lighting
- Filter holder for 1 or 2 cups
- Anti fingerprint stainless steel
- Use ground coffee or pods

Colour available: stainless steel

WD 140

14cm Warming drawer

Key features

- Temperature adjustable from 30° - 85°C
- 6 Place settings
- Can be used in conjunction with ACE 100 coffee maker, combination microwave and speed oven
- Power on light
- Max load 25kg

Colour available: stainless steel

AKB 651

14cm Accessory drawer

An optional 14cm high Accessory drawer can be fitted below 46cm high 'Premium Collection' appliances.

MICROWAVES
FOR VERSATILITY
IN COOKING

INTELLIGENT MICROWAVES FOR VERSATILITY IN COOKING

Whirlpool's advanced 6TH SENSE full combination microwave combines 3 different cooking methods, convection, steam and microwave. This allows you to create brilliant meals in a fraction of the usual time. Easy to install, with a large interior

space for big dishes, this oven, which matches the Premium range products, has style to suit your kitchen as well as the functionality to suit your lifestyle.

Whirlpool's two innovative built-in microwaves allow for the greatest possible flexibility in organizing your kitchen. Choose either the Large 40L capacity or the Mini Built-in with its 22L capacity, each contained in ergonomic designs that install easily wherever is most convenient for you.

Their simple, linear shape and the understated elegance of their stainless steel and glass finishes fit seamlessly into any kitchen, and perfectly complement the other Whirlpool Built-in products. Sophisticated functionality matches the smart appearance in both ovens, cooking a surprising variety of dishes beautifully: everything from pies to potato gratins, vegetables to roast chicken, all cooked with the qualities you might expect from a regular oven, with the speed of microwaves.

MANY WAYS TO ACHIEVE PERFECT COOKING RESULTS

Whirlpool microwave ovens are innovative combinations of microwave and conventional oven technologies, offering the quality cooking performance one expects from the former with the far greater speed of the latter.

Easy Clean Treatment

The latest technology applied to the care of stainless steel so that grease, fingerprints, and dust are easily removed.

This special treatment preserves your appliances from scratches and from the effects of ageing on stainless steel, making them always look perfect.

Speed Oven

Cook like you always have with your traditional oven, in half the time The Speed Oven is a space-saving appliance based on traditional cooking technology, but with the added boost of microwaves when and if needed, all in one product.

This can save you up to 50% in cooking time, depending on the recipe. It also features “Jet Menu”, the text assisted display. Amongst further features the multi level cooking on 3 different levels and a speed defrost function for faster defrosting. The 40L cavity of the Speed Oven is enamelled for easy cleaning. The Speed Oven can be combined with a warming or accessory drawer to fit perfectly into a 60cm cavity. Part of the Gallery Collection, it elegantly matches the Premium style appliances (see page 34).

6TH SENSE® Combination

This beautiful built-in microwave, part of the Gallery Collection, is available in Premium style aesthetics. It has a 40L stainless steel cavity and a full-width drop-down door. The 40cm turntable accommodates even the largest of dishes and its controls make it easy to use wherever it is installed. This microwave oven can be combined with a warming or accessory drawer to fit perfectly into a 60cm niche. Whirlpool's Pro-fit installation system means you can install it in a fraction of the usual time using just two screws.

Cooking has become a game: Jet Menu User interface

No matter what you want to cook, the Jet Menu assisted mode knows just how to do it. The innovative text assisted display matches perfectly Whirlpool's BI ovens and has over 10 food types, 70 pre-set recipes. You tell the oven what you want to prepare and it chooses the ideal programme and time for a perfect result every time. The text assisted LCD display uses easy-to-read symbols and text to give you clear indications throughout the cooking process.

Mini Built In

The Mini built-in has a host of clever ergonomic features that make it a pleasure to use. The cavity bottom is at the minimum possible height, making it easy to reach and horizontal top controls are likewise placed for best access. A recessed turntable is designed never to fall out during unloading and the wide door opening angle of 105° makes it easy to load and unload even large dish. Its refined, flat design fits perfectly into all standard cupboard sizes: 50cm and 60cm wide. It can be installed in columns, or the upper cupboard, using the dedicated mounting kit. So even if space is limited, you're sure to find the place for it in your kitchen that best allows you to keep an eye on the cooking process. And its unique dual ventilation system ensures humid air is never in contact with the cupboard in which it is installed.

MICROWAVE OVEN FUNCTIONS

Crisp

3 heat sources in one function: ferrite crisp plate, grill and microwave inlets, for fast, even cooking, browning and crisping of pies, quiches and pizzas top and bottom. Food cooks as fast inside as out and so is never under-cooked or over-grilled.

Jet Defrost

Defrosts 7 times faster than a conventional microwave oven with even microwave distribution that works directly on the water molecules inside the food, defrosting from the inside for better performance . All you have to do is select the food type, set the weight and press start.

3-D System

This revolutionary system ensures even heat circulation through fully 3-dimensional microwave distribution. Food always cooks evenly and thoroughly throughout.

Quartz grill

Fast and efficient with numerous advantages over a traditional Infrared Grill. It uses less energy, but heats up faster (60 seconds) and reaches a higher temperature so it cooks 3 times faster and burns away dirt on its surface, making it entirely self cleaning.

Traditional Grill

Fast, extremely powerful grill ensures grilling and browning results as good as those from a traditional oven. The big tub grill element can be tilted for easy cleaning.

Jet stream convection system

A Whirlpool patented forced convection process for perfectly even cooking results. Four large air inlets on the back wall evenly distribute powerful air streams throughout the cavity. Inlets are in the corners so no air is blown directly onto food, avoiding overcooking or excessive local browning.

6TH SENSE® Steam

Fast, easy 6TH SENSE® steam function, engineered to give great results every time. The new heat-resistant, dishwasher-safe oval steamer accommodates big loads. The steamer is transparent and you can constantly monitor cooking. Advanced sensor technology also monitors cooking to ensure food preserves texture and nutritional value.

6TH SENSE® Re-heat

This function will help you achieve perfect results on chilled or frozen food with one touch functionality.

PREMIUM

AMW 575

Premium 6th Sense®
full combination microwave oven

Key features

- Microwave, crisp grill and conventional cooking
- 40 litre capacity with 40cm diameter turntable
- 'Jet Menu' assisted cooking - just set the food type and weight

FOR ALL JOBS**

INTELLIGENT HOBS FOR ALL JOBS

Play, explore, experiment: Origami Hob range

Whirlpool's Origami cooking system features a series of beautifully designed modular elements that let you tailor a hob to suit your space, from 60cm to the extra large 75cm. Sheer, flat, easily cleanable surfaces are the basis for grids and pan supports that take a wide variety of pots and pans. High-tech burners and sophisticated accessories give you a professional chef's control and the freedom to explore dishes from all over the world. With versatility like this, you can easily make a difference in your cooking every day.

Different configurations for different needs.

Every kitchen and cook is different. Origami offers a choice of hob configurations that recognise these differences, incorporating burners for everything from quick frying to simmering.

Classic 60cm

Available with 4 burners including Whirlpool's 4-crown burner option for fast frying.

75cm with normal (60cm) cut out

Available with 5 burners including a 4-crown burner for fast frying and wok cooking using a wok adaptor.

Accessories

The Origami cooking system extends your cooking range and supports you at every stage of the cooking process with an exclusive range of dedicated accessories designed to be easy to use and easy to clean. Specially tailored pots, pans and surfaces fit perfectly on the hob grids for guaranteed stability and extend your range of possibilities by giving you a whole new set of inventive cooking methods such as cooking on stone.

Cooking stone

With strong support positioning it firmly on the hob, the cooking stone provides a novel way to create delicious meals with meat, fish and vegetables. With two large non-convective handles, it can be easily moved to serve food directly at the table and keep it warm.

Grill plate

Fitting easily onto the hob with its own support, the non-stick, cast iron ribbed plate provides delicious, high quality grilling, broiling and barbecuing results.

Panini Toaster

Panini toaster sits directly on the hob and has heatproof, non-conductive handles with which it can be quickly and easily turned over to ensure that both sides of your toasted sandwiches are cooked evenly. The large 'double' size toasting area is big enough to hold two sandwiches at once and can also be used for toasting vegetables.

Chopper

Made from robust wood, the elegant chopping board can be used both on the hob and on work surfaces, either as an extra support for other accessories, protecting tables and worktops or for chopping vegetables, meats and fish.

HOBBS RANGE

Induction Hobs

Induction heats the pan, not the hob. An electromagnetic field is created when a ferrous metallic pan is placed on the hob. The electromagnetic field passes through the ceramic glass top and heats the base of the pan instantly. Other features include touch controls, residual heat indicators and precise sensor assisted electronic temperature control. As well as saving time and energy, induction hobs provide guaranteed safety, ergonomically simple touch controls and are extremely easy to clean thanks to the sheer, flat surface. The precise induction technology guarantees perfect control for everything from melting chocolate to frying and the multi zone heater means the hob can heat even exceptionally large pans of up to 280 mm diameter. Whirlpool induction hobs are available in 60cm and 77cm in a black ceramic glass finish.

Filo Gas Hobs

Superbly finished in easy clean stainless steel and with a one piece baseplate that fits flush with the worktop, Whirlpool 'Filo' Gas Hobs have a sophisticated designer look. There are two models - a 5 burner model and a slim 3 burner model that is perfect for island units. Differently sized normal, semi-rapid and rapid burners provide maximum cooking flexibility and both models have an impressively large, high power 'Wok' burner, with push/turn ignition and are suitable for LPG conversion (kit included).

Conventional Gas Hobs

Simple design, easy to use controls, super reliability and easy clean enamel tops make these uncomplicated hobs a practical choice for any kitchen.

Safety

Whirlpool care about safety. All of our gas hobs feature a safety system which cuts off the gas supply in the event of flame failure. Finally, for your safety and convenience there are now more Whirlpool hobs with front controls than ever before.

Gas on Glass/Stainless Steel

Our Premium designer gas on glass hobs are a perfect match for our Premium ovens and an elegant design feature in themselves. A choice of full stainless steel or black glass with stainless steel trim contrast attractively with the black pan supports to create a smart, professional look.

Vitroc ceramic

Touch control halogen hobs cook with light.

Heating is virtually instantaneous and can be precisely controlled. With slim designer frames and residual heat indicators, Whirlpool Touch control halogen hobs offer top performance, design and safety.

Ceramic hobs heat up faster than conventional electric hobs and have four 'quick light' zones and a slim line frame surrounding a large ceramic surface with residual heat indicators. Whirlpool vitroceramic hobs are available in 60cm, and 77cm versions with different control types, either knob or touch control.

Direct Access User Interface

Direct access user interface is exceptionally easy to use, giving you direct access to the desired functions and special dedicated functions to perform all kinds of cooking, delivering superior performance. The special functions include fast boiling, timer, and pause modes.

AKM 489

Filo 90cm gas hob

Key features

- 5 Burners including 4 Crown 'Wok' burner
- Cast iron pan supports
- Flame failure safety system

ORIGAMI GAS

OPTIONAL ACCESSORIES

FOR USE WITH ORIGAMI HOBS
AKT797 & AKT699

AMC 959 New Ollar Cooking Stone

FEATURES:

- Ollar cooking stone
- Stainless steel stand
- Natural wood base (can also be used as a chopping board)
- Ideal for cooking meat, fish and vegetables
- Can be used for cooking or serving food
- For use **only** with Origami hobs

AMC 958 New Cast Iron Griddle

FEATURES:

- Cast iron griddle
- Stainless steel stand
- Natural wood base (can also be used as a chopping board)
- Ideal for cooking meat, fish and vegetables
- Perfect for lower fat cooking
- Can be used for cooking or serving food
- For use **only** with Origami hobs

AKT 699

60cm 'Origami' gas hob

FEATURES

- 60cm Wide
- Convenient front controls
- Push & turn control knobs
- Integrated ignition
- Different size burners
- Unique four crown burner
- Double cast iron supports
- Slim frame design
- One-piece baseplate
- Safety system
- LPG Convertible (kit required)
- Optional accessories available

Colour available: stainless steel

AKT 797

75cm 'Origami' gas hob

FEATURES

- 75cm Wide
- Convenient front controls
- Push & turn control knobs
- Integrated ignition
- Different size burners
- Unique four crown burner
- Three cast iron pan supports
- Slim frame design
- One-piece baseplate
- Safety system
- LPG Convertible (kit required)
- Optional accessories available

Colour available: stainless steel

AMC957 New Panini Toaster

FEATURES:

- Enamelled aluminium exterior
- Teflon-coated non-stick interior
- Ideal for cooking panini or toasted sandwiches
- For use **only** with Origami hobs

AMC960 Complete Accessory Pack

FEATURES:

- Cast iron griddle
- Ollar cooking stone
- Panini toaster
- Stainless steel stand
- Natural wood base (can also be used as a chopping board)
- For use **only** with Origami hobs

AKM 441

70cm Gas hob

Key features

- 4 Burners, 3 sizes
- Cast iron pan supports
- Flame failure safety system
- Convenient front controls
- Push & turn ignition
- One piece easy clean baseplate
- LPG Convertible (kit required)

Colours available:

fully stainless steel AKM441/IX

AKM 393

70cm Gas hob

Key features

- 5 Burners including 3 Crown "Wok" burner
- Cast iron pan supports
- Flame failure safety system
- Convenient front controls
- Push & turn ignition
- One piece easy clean baseplate
- LPG version available

Colour available: stainless steel

AKM 260

60cm Gas hob

Key features

- 4 Burners - 3 sizes
- One piece easy clean top plate & control panel
- Flame failure safety system
- Easy grip control knobs
- 2 Piece burner with hidden ignition
- Electronic button ignition

Colours available: white, stainless steel & black

Also available AKM269

- Converted for LPG use

77CM TOUCH CONTROL INDUCTION

AKM 995

77cm Touch control induction hob

Key features

- 4 Energy efficient induction cooking zones
- Touch control operation
- Easy to clean smooth glass surface
- 9 Power levels
- Booster option on any zone
- Precise temperature control
- 99 Minute timer
- Pan detection (switches off zone if pan removed)
- Residual heat indicators
- Child lock

Colour available: black ceramic bevelled glass

Induction cooking requires pans made of ferrous metal, pans can be tested by using a fridge magnet, if it sticks to the base of the pan it is suitable for induction cooking.

60CM TOUCH CONTROL INDUCTION

ACM 703/BA

60cm Touch control induction hob

Key features

- 4 Energy efficient induction cooking zones
- Touch control operation
- Booster option on any zone
- Easy to clean smooth glass surface
- 9 Power levels
- Precise temperature control
- 99 Minute timer
- Pan detection (switches off zone if pan removed)
- Residual heat indicators
- Child lock

Colour available: black ceramic bevelled glass

ACM 702

60cm Touch control induction hob

Key features

- 4 Energy efficient induction cooking zones
- Touch control operation
- Easy to clean smooth glass surface
- 9 Power levels
- Booster option (rear left zone)
- Precise temperature control
- 99 Minute timer
- Pan detection (switches off zone if pan removed)
- Residual heat indicators
- Child lock

Colour available: black ceramic glass

AKT 895

77cm Touch control ceramic hob

Key features

- 2 Halogen and 2 Dual Quicklight zones
- Touch control operation
- Easy to clean smooth glass surface
- Special low temperature/keep warm/fast boil settings
- 99 Minute timer
- Residual heat indicators
- One touch "Pause cooking" safety system
- Child lock

Colour available: black ceramic bevelled glass

AKT 863

60cm Touch control ceramic hob

Key features

- 1 Halogen and 3 Quicklight zones
- Touch control operation
- Easy to clean smooth glass surface
- Special low temperature/keep warm/fast boil settings
- 99 Minute timer
- Residual heat indicators
- One touch "Pause cooking" safety system
- Child lock

Colour available: black ceramic bevelled glass

CERAMIC AND SOLID PLATE

AKM 330

60cm Solid plate hob

Key features

- 4 Solid plate zones (1 Rapid)
- Easy grip controls
- One piece easy clean top plate and control panel

- Power on light

Colours available: stainless steel, black or white

AKM 613

60cm Ceramic hob

Key features

- 4 Quicklight zones
- 'Smart Line' slim frame
- 'Lift and clean' control knobs

- Power on light
- Residual heat indicators

Colours available: stainless steel, black or white trim with matching control knobs (or bevelled edge with black and stainless steel trimmed knobs).

HOODS

CLEAN DESIGN
AND AN AIR
OF INTELLIGENCE

CLEAN DESIGN AND AN AIR OF INTELLIGENCE

Whirlpool offers an outstanding choice of hoods to fit any kitchen, with perfect design matches for all the other products in the Premium, Essence and Linear built-in ranges. Whatever your particular functional and style requirements, you'll find a hood to suit you, with the elegant design and finish you expect from all Whirlpool

appliances and advanced, user-friendly technology that automatically senses what it has to do. Whirlpool's policy of continuous testing ensures that whichever hood you choose, the lamp's brightness and the airflow consistently maintain top performance over time.

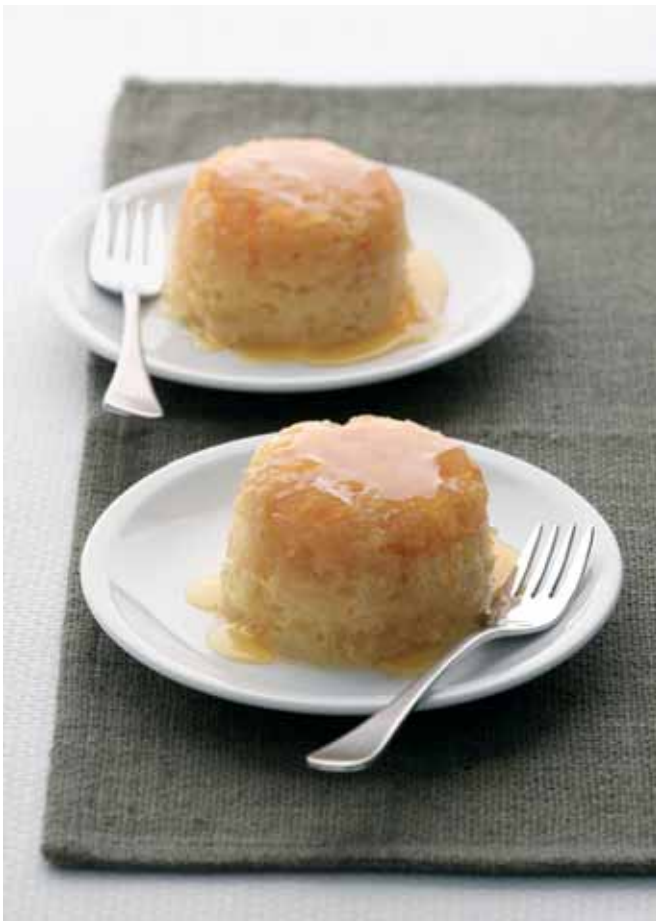

Design

Today's kitchens are places for eating and entertaining as well as cooking. Whirlpool hoods not only improve the atmosphere of your kitchen, they are also exceptionally stylish.

Whirlpool's decorative hoods are the missing link between home appliances and interior furnishing. Design objects in their own right, they are stylish pieces of furniture and become part of the lighting setup of your kitchen, while at the same time playing a functional role to levels of absolute excellence.

Whirlpool's hoods are available with matching ovens, hobs, dishwashers and fridges and are designed to be seen and admired. All Whirlpool hoods are suitable for either 'Ducted' or 'Re-circulating' installation. Re-circulating hoods draw air through a grease filter and a carbon filter before returning filtered air to the kitchen. Extraction hoods draw cooking fumes through filters and expel them to the outside via metal ducting.

CLEAN DESIGN AND AN AIR OF INTELLIGENCE

Deep Silent hoods

This ground-breaking appliance offers an unprecedented level of noise reduction, making your kitchen the perfect place to entertain guests in peace, even while you are cooking. Fitted with the innovative EDS³ system, it is 15% quieter than a conventional hood. The attractive and intuitive LCD control display offers three different speed settings plus an intensive booster, so you can adjust the

Deep Silent Hood to match whatever kind of cooking you are doing. The aluminium filter with high efficiency capturing 94% of grease is dishwasherable, and the hood is available with the easy clean treatment, a special process applied to stainless steel to make grease, fingerprints and dust easily removable.

Perimeter hood

The Whirlpool Perimeter hood is an innovation in hood technology, absorbing cooking vapours and fumes along the outer edges of the hood bottom rather than directly through it. It does this by means of a 'rettify' panel that breaks the flow of the fumes, directing them towards the outer edges of the hood bottom where more of the grease can be collected. In addition, with the filter concealed, noise levels are lower, the entire outer surface of the hood is easy to clean and the hood becomes a more attractive, cohesive design element in your kitchen.

Touch control user interface

Stylish, high tech, extremely easy to operate. Different types of touch control user interfaces with LCD and intensive function. (Depending on model).

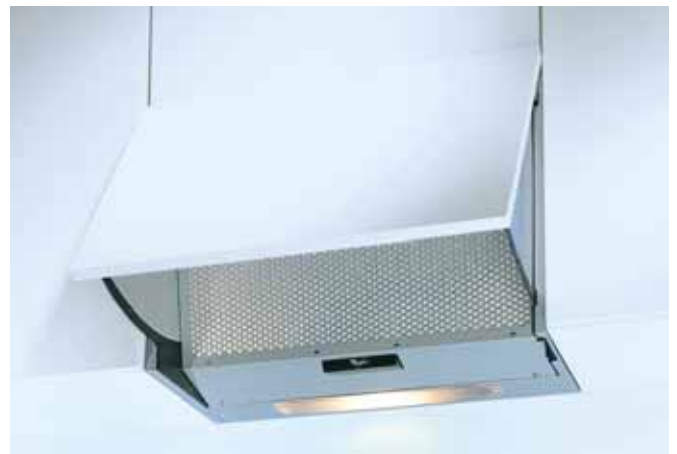

Integrated hoods

Whirlpool integrated cooker hoods are hidden from view when not in use. This model has a pull up door which integrates with your kitchen cupboards and turns both the hood and the built-in hob light on when it is opened. (It also guides cooking fumes into the filter and turns the hood off when closed).

Compact hoods

Whirlpool compact hoods are perfect for fitting under a wall cupboard. Ideal for smaller kitchens, these models have easy to use slider controls and are also available in white and stainless steel.

AKR 968

Super silent 90cm cooker hood

Key features

- 3 Speed plus intensive, LCD soft button operation
- 2 x 20W Halogen lamps
- Highly efficient dishwasherable metal grease filter
- Max extraction rate 820 m³/h
- EDS³ system
- Ducted or re-circulating (filter needed) operation

Colour available: stainless steel

AKR 951

100cm Island cooker hood

Key features

- 3 Speed, soft light push button operation
- 4 x 20W Halogen lamps
- 2 Dishwashable metal cassette grease filters
- Max extraction rate 630 m³/h
- Light and speed indicators
- Ducted or re-circulating (filter needed) operation

Colour available: stainless steel

AKR 995

90cm Perimeter aspiration cooker hood

Key features

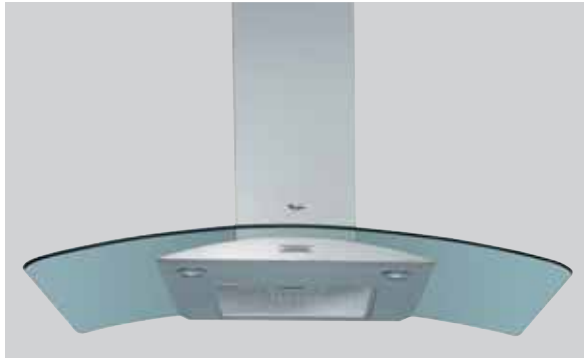

- 3 Speed, soft light push button operation
- 2 x 20W Halogen lamps
- Dishwashable metal cassette grease filter
- Max extraction rate 640 m³/h
- Light and speed indicators
- Special perimeter aspiration
- Ducted or re-circulating (filter needed) operation

DISHWASHING

**INTELLIGENT
DISHWASHERS
THAT ADAPT TO
DIFFERENT NEEDS**

INTELLIGENT DISHWASHERS THAT ADAPT TO DIFFERENT NEEDS

AquaSteam: water and steam together for effective cleaning

For the first time, Whirlpool brings you the enhanced cleaning power of steam in a dishwasher. In the AquaSteam dishwasher, sophisticated sensors and intelligent programmes work in harmony to ensure perfect cleaning results, while treating your dishes with the utmost care.

The AquaSteam dishwasher offers you the best ever washing performances, even on delicate items, using the gentle power of steam.

6TH SENSE® technology creates steam in the most appropriate moment of the cycle, effectively softening up dried-on soil, and helping eliminate bacteria. So it cleans your dishes, sanitizing them as they are washed. And with savings of up to 30% in resources, it's good news for the environment as well.

Multiple choice with advanced, straightforward dishwasher technology

Whirlpool dishwashers offer versatile possibilities whether you have a lot of dishwashing to do or very little and will integrate perfectly with your kitchen thanks to Whirlpool's high quality finish and clean edged design. Furthermore, whatever you choose, you'll find it comes with a range of features for hygiene, energy efficiency and time and labour saving that mean you can rely on the machine to get it right so you don't have to.

Lowest Energy Consumption

Brand new generation of dishwasher that thanks to its innovative technology, it delivers a 10%+ energy saving compared to today's A-class dishwashers. It offers optimum cleaning and drying performance while maintaining very low noise levels. Environmentally friendly dishwashing is now a reality.

Self cleaning filter.

Thanks to the special self cleaning filter, you don't need to clean the filter anymore. It automatically regenerates water every 10 seconds and eliminates food residues through its soak and pulse action.

PowerClean

Cleans the tough, burnt-on food away from pots and pans.

The innovative PowerClean technology eliminates the need to soak and scrub baked-on pots and pans by hand. Just select the PowerClean option and thirty-two targeted high pressure spray jets will handle your hardest job to clean the dirtiest pots and pans. All without any additional water consumption.

Dedicated space for pots and pans.

PowerClean dishwashers are innovative when it comes to space management. A new loading solution for pots, pans and casseroles means they can be placed vertically in the back of the lower rack, facing the 32 high pressure spray jets. This new loading pattern makes 30% space more available in the centre and front of the rack for delicate plates and cutlery.

INTELLIGENT DISHWASHERS THAT ADAPT TO DIFFERENT NEEDS

Party Programme

Party is the special programme for full loads of glasses and party dishware. Combined with the Party Glass Holder, it ensures excellent cleaning results and maximum safety and care.

Super Silent Overnight programme

Silent nights or quiet conversations are no problem around a Whirlpool dishwasher. The Overnight programme is super silent at only 39 dBA thanks to the modular water pressure system.

One-Touch™ 6TH SENSE®

Perfect washing results with every kind of soil and load; and up to 30% savings in time, water and energy compared to a normal machine. The One-Touch™ program steered by 6th Sense technology even takes care of the program setting (from 40° to 70°C). With One-Touch™ 6th Sense® you don't even have to select a specific option or temperature, all is taken care of automatically.

6TH SENSE® - two sensor programmes

Intelligent sensors monitor soil levels in the wash, adapting the temperature accordingly throughout the cycle and stopping only when the dishes are perfectly clean.

Simply select a specific temperature range (40°-55°C or 60°-70°C) related to the level of soiling, and the dishwasher knows exactly what to do in any situation. You never have to guess what setting to put it on and it never uses more energy, water or time than is absolutely necessary, allowing for up to 30% savings.

Digital full door electronics

Full door models come with a stylish high tech digital interface and options including multi zone washing, sani-rinse and 4 in1 tablets as well as a re-set button so you never have to worry about getting the settings wrong.

Programmes and options are clearly distinguished on the interface with 2 displays, one for programme selection and one for setting all the options (such as multi zone and delay timer, so programming is extremely easy.

Aquacare sensors

You'll never have to find out the level of hardness in your local water supply because you'll never have to set the water softener. Sensors automatically detect the level of hardness in the water and adjust the softener accordingly, ensuring glasses get the right treatment cycle after cycle.

Antibacterial rinse

A one-touch operation that modifies the final rinse in the wash cycle to reduce bacteria by up to 99.99%, giving you an ultra hygienic wash without the use of disinfectants or antiseptic agents. Useful for loads that have been in the dishwasher for a long time before washing or any time you want to sanitise the tub or load. Especially recommended for the following:

- When you need optimal cleaning and sanitization for a baby's dishes
- When dirty dishes have been left inside the dishwasher for a long time causing bacteria to build up
- When you want to sanitize your dishes because a member of the family is ill
- When you feel the need to sanitize your tub.

AutoClean Filter

The new AutoClean filter and the innovative water boost system put an end to manual pre-rinsing. You no longer need to use energy-consuming, high temperature programmes. Excellent results can be achieved even on heavily soiled dishes with the standard Bio eco 50° C programme. The water booster generates a 30" pulse that clears food residues. The filter's highly efficient self cleaning capacity means it requires maintenance only twice a year.

ALL in 1

The innovative tablet system "all in 1" is designed to obtain the best performance from the new generation of tablet. You can still get perfect cleaning results selecting the 2 in1 and 3 in1 options, but by selecting the "all in 1" you will have top cleaning performance with every conceivable kind of tablet.

Zone washing

Washes loads in either the upper or lower rack as half loads, so you don't have to wait until the dishwasher is full to do a wash with efficient energy and water use.

Half load

This is the perfect everyday option, allowing you to run a cycle to wash a small load without worrying about wasting resources. You can load both of the racks only half full and save up to 15% in water, time and energy.

A SENSE FOR FLEXIBILITY IN SPACE MANAGEMENT

Whirlpool's smart spatial thinking not only creates more secure methods of holding small items and accommodating large items; it also allows you to treat different areas of the load in different ways and run half loads, for better cleaning and energy efficiency.

Party Glass Holder for lower rack

Whirlpool dishwashers adapt perfectly to your lifestyle, always giving you total cleaning control. With the new Party Glass Holder you can load up to 48 glasses in the lower rack, with perfect stability and care. It's so flexible it will accommodate most kinds of stem glasses, and it is easy to use. When you don't need it, you can fold it away and store it in your kitchen cutlery drawer.

Optiflex Racks

Whirlpool's Optiflex racks have been designed for an altogether more pleasurable and intuitive experience of loading the dishwasher. The lower rack, with its foldable tines, provides optimum space for both dishes and pans. By folding back some of the tines you can create space for your biggest items. The upper OptiFlex rack lets you make the most of the space to fit in tall and short glasses, bowls and cups. It also has specially designed flaps to hold long cooking utensils. Its high sides ensure that even small plates are held firmly in place. The rack also has a big handle, so you can move it without effort and you can raise or lower it to free up space for bigger saucepans in the rack below.

Fully integrated range

Hidden talent

Whirlpool's fully integrated dishwashers feature controls on the top edge of the door and are designed to accept a panel (stainless steel, wood or laminate) and door handle to match your kitchen furniture. When closed, the dishwasher is completely hidden from view giving your whole kitchen a neat, integrated appearance. The drop-down door is thoughtfully designed to stay open at any angle, allowing you to load and unload with both hands. The fully integrated range is available in 45cm and 60cm configurations.

Semi integrated range

Convenience by design.

Whirlpool's semi integrated dishwashers have exposed control panels and combine the looks and sophistication of a built in appliance with the convenience of being able to adjust the controls without having to open the furniture door to access the machine. Semi integrated models have specially designed control panels which align perfectly with your kitchen furniture and are available in a choice of stainless steel and black.

*For most economical results, Whirlpool recommends cold fill only (25° C max) Water pressure required: 0.3 - 10 bars
 Performances are based on standard test results for the test programme shown, using cold water fill in accordance with EN.50242.
 Classification range is on a scale from A (most efficient) to G (least efficient).
 Actual energy consumption will depend on how the dishwasher is used.
 Annual energy and water consumption is based on an estimated 220 cycles of the standard programmes.

FRESHER FOOD**

INTELLIGENT REFRIGERATION FOR FRESHER FOOD

Whirlpool's built-in fridges offer a choice of sizes to suit your space, with innovative, tailored storage solutions for numerous types of food and drink, advanced cooling technology throughout to keep food fresher for longer. Rational, beautiful design match the other appliances in Whirlpool's built-in ranges, with ultra efficient fridges in A and A+ Class guaranteeing energy savings and helping protect the environment.

The ultimate cool design innovation in Built-in

90 cm horizontal architecture refrigerator

This refrigerator is easy to load and allows easy access to food, on top of an increased capacity for fruits, vegetables and dairy products.

Thanks to 6TH SENSE® technology temperature is checked every second, ensuring that the ideal temperature is restored 5 times faster than in other refrigerators. This makes your food look, smell and taste fresher for longer. Cutting edge technology protects your food and removes odours thanks to the fan action, combined with an antibacterial filter. This refrigerator also features an electronic control panel, and removable trays for easy cleaning and to contain spills.

Side-by-side

Whirlpool American style 'side-by-side' fridge freezers bring a new dimension to home refrigeration with large capacities of up to 473 lt. and convenient 'shallow depth' options. Offering super-efficient 'A+' Class energy performance, they ensure very low running costs. Convenient, energy and space saving features like Indoor ice and chilled water dispensers, '6th Sense®' intelligent sensor control, temperature controlled 'Cool Zones', 'Total No-Frost' ice-free freezers and electronic LCD displays help Whirlpool 'side-by-sides' keep food fresher, and for longer than conventional fridge freezers.

6TH SENSE® Technology

6TH SENSE® Side-by-Side fridges are controlled by an electronic nerve centre connected to intelligent sensors inside the storage area that sense any change in storage conditions, adapt by blowing chilled air directly to the affected area and restore optimum conditions with perfect control up to 5 times faster than in a normal refrigerator, ensuring your food looks, smells and tastes so fresh.

Total No Frost and Multi-flow system for optimum air circulation

Total No Frost circulates chilled air around the storage areas, reducing humidity to prevent the formation of ice, thereby eliminating the need for defrosting. Frozen items don't stick

together, labelling stays legible and no storage space is wasted by accumulated ice. Besides the Multiflow system blows chilled air evenly all around the fridge interior to ensure storage conditions are perfect throughout.

LCD display

User-friendly interface gives constant updates on performance and access to functions: cool drinks fast or power down to save energy.

Water filter and dispenser

Highest water capacity on the market. Dispenses 1500 litres of water before the filter needs changing. Indicator light on the control panel shows when to change it.

In-door Ice

Ice compartment in the door gives 20% more room in the freezer and good visibility of ice. Bucket can be easily removed to dispense ice and for cleaning. First ice made is first out, so ice spends less time in the freezer.

Large capacity door shelves

Extra storage space in the most accessible part of the fridge.

Security

Black-out memory function and alarm warns you of any problems. Also equipped with child-lock.

RANGE

Built-in Combi 6th Sense® No Frost

The elegant BI Combi 6th Sense® No Frost offers better food conservation, faster chilling of drinks and desserts and faster freezing of frozen food, as well as saving energy when you're away for long periods. You can also monitor its cooling using the easy access digital display to see the selected temperature and options.

6th Sense® technology

Whirlpool's unique 6th Sense® technology maintains the freshness of your food longer with intelligent sensors that constantly sense and adapt to temperature changes. When the door is left open or after a power cut, the sensors detect the change and rapidly channel chilled air into the storage zone, restoring the temperature 5 times faster than a conventional fridge, making for precise and complete control of storage conditions. And unlike a conventional fridge which cools continuously, thanks to their sensors, 6th Sense® models cool only when needed, making them environmentally friendly and energy efficient. (ART 496/NF & ART 488)

No Frost Technology

This exceptionally effective technology completely eliminates the need for defrosting. Frozen items don't stick together, labelling stays legible and no storage space is wasted by accumulated ice. No Frost circulates chilled air around the storage areas, reducing humidity to prevent the formation of ice. No-frost's even temperature control also helps to keep food fresher longer.

Functions

Temperature display

Digital displays show the set temperatures in the fridge and freezer compartments.

Extra function for Big freezer Loads

A special freezer boost mode that can be activated 24 hours in advance to assure ideal conditions for freezing exceptionally heavy loads (e.g. 12kg).

Vacation mode

A simple function that allows the fridge to be switched off while the freezer stays on, saving energy while you are away without the inconvenience of emptying and switching off the appliance completely.

Child Lock

This locks the functions, preventing the danger of children altering functions or functions being altered during cleaning.

Fast bottle chill: Party mode

Properly chilled drinks are a key feature of any party. This useful feature cools beer and wine in the freezer, with no risk of freezing, in only 30 minutes, so the party starts almost immediately. (20 TB L4).

Black out alert

LED blinks when temperature rises above -9° in the freezer.

Intelligent space management by design

Bottle balcony

Up to 2 litre capacity storage for bottles in an extra large, rounded transparent door shelf, easily adjustable and removable.

Crisper Drawer and shelf retention

Drawers and shelves are fixed to the interior with 'safety stop' functionality, so they won't fall out when opened completely.

Tempered glass shelves

Extra strong glass shelves, easily removed for cleaning and quickly adjustable to different heights.

Spill-guard

Attractive, transparent plastic edges on shelves provide handy 'spill-guard' function, preventing spillage in the fridge spreading beyond the shelf on which it happens.

Twin crispers

Abundant storage capacity for fruits and vegetables. Transparent, so you know at a glance where things are.

Bottle rack

Metal finished rack for storage of wine bottles, can be inserted in place of an ordinary flat glass shelf.

Egg tray

Designed to fit snugly in the dairy compartment with capacity for 6 eggs.

Antibacterial system

Whirlpool, together with Microban®, the market leader in antibacterial solutions, have developed an antibacterial air filtration system: state of the art technology designed to help reduce unpleasant odours in your appliance. Fridge air passes through the high-tech filter that has built-in Microban® antibacterial actives. This Hygienic filter treated with Microban® helps trap and kill airborne micro-organisms caught within it. It keeps working for the life of your filter, - about 6 months - after which, the filter is easily replaced.

SENSIN
THE DIFFER

WINE STORAGE

THE FASCINATION OF WINE

THE FASCINATION OF WINE

The perfect environment for your wines: the Wine Cellar.

To mature properly, a wine needs to be stored in the right position at a constant temperature, and with the perfect humidity. Whirlpool's wine storage solutions have been developed for connoisseurs who care passionately about their wines. Electronic systems with low vibration dampeners in the wine cellar and under counter wine chiller ensure that your precious wines are kept at their best. Whirlpool's technology creates the right conditions to preserve their qualities and allow them to mature in the most natural way. You'll be able to maintain a collection of bottles, each maturing at its own rate into truly fine wines.

Always under control

The glass doors are fitted with special UV protection so that your precious wines are still protected against harmful UV radiation. No matter where your Wine Cellar is positioned – your wine has perfect protection.

Wooden shelves

Whirlpool wine storage appliances feature natural looking, stylish oak shelves. Storing the bottles lying down ensures that the cork remains damp at all times, effectively preventing the wine from oxidising.

Maximum storage temperature control

A constant temperature between 10 and 15 °C is recommended for the long-term storage of wines. In Whirlpool wine storage products, precise temperature control, either manual or electronic, ensures stable conditions all year round.

ARC 226

WASHING

INTELLIGENT
WASHING
MACHINES
THAT SENSE
THE DIFFERENCE

Conservation & Innovation

Whirlpool built-in washing machines and washer/dryers are responsibly designed to save water, energy & detergent. With shorter programmes, they not only help conserve the environment, they deliver superb cleaning results and help you get the laundry done quicker than ever!

Electronic displays

Our built-in washer/dryer has an electronic display which guides you through programming.

'A' Class performance

'A' Class washing machines produce superb results with maximum economy.

Big doors & big 5kg washdrums

Large doors make loading/unloading easy. Bigger drums mean fewer washes. They also save time and energy, help reduce creasing and improve cleaning performance.

Robust controls & clear displays.

All Whirlpool washing machines have sturdy controls (designed for years of reliable service) mounted on clear, easy to understand displays.

Wash and Dry all-in-one.

No room for a washer AND dryer? Whirlpool washer/dryers solve the problem with excellent washing and drying performance in one appliance.

Caring Solutions

Up to 19 wash programmes

A comprehensive choice of wash options with solutions for every situation.

Up to 1400r.p.m. Spin Speed

Fast effective drying.

Auto Half Load

Washes small lightly soiled loads economically.

Spin Speed Reduction Option

An extra care option for delicates

Quick Wash Programme

A fast wash that saves time, water and energy.

Intensive rinse

Longer rinse option, ideal for sensitive skin.

Automatic Water Control

Adjusts water intake to each load.

Wool programme

Gentle rocking action cradles woollens to avoid 'bobbling' of wool fibres.

Condenser drying

Fast, effective drying where steam is condensed to water and simply pumped away so the washer/dryer does not need venting to the outside and can be positioned anywhere in the kitchen or utility room.

NB: Not all models have all features. If certain features are important to you please check individual product descriptions before purchase.

WHIRLPOOL SERVICE

A PERFECT SENSE OF SERENITY

SENSING THE DIFFERENCE

Whirlpool offers a dedicated service for you, providing access to a range of services tailored to your every need, giving you the perfect sense of serenity.

CONTACT CENTRE

Answers to all your questions

The customer service contact centre provides you with direct access to Whirlpool's specialised operators for everything you need to know about Whirlpool appliances. Practical day to day help includes information on our products, accessories and warranties.

AUTHORISED SERVICE

The quality of authorised service

Whirlpool offers an expert repair service via our authorised service network, giving you service by Whirlpool trained technicians, guaranteeing the use of genuine spare parts and fast, flexible availability to suit your needs.

EXTENDED WARRANTY

Protected for 8 years

Whirlpool appliances are covered by a one year guarantee and any defects that occur in the first year will be repaired FREE - including all parts and labour (arising from normal usage and providing the appliance has been installed correctly).

All Whirlpool Appliances are available with a Free *8 Year Parts Guarantee option. To apply for your Free Extended Parts Guarantee simply return the application form enclosed with the product: Under the terms of the Whirlpool Extended Parts Guarantee you must complete and return the form to the address below within 30 days of the purchase date.

*8 Years from date of purchase on all functional parts.

PRO.FIT

Easy Fitting

Whirlpool applies the same innovative thinking that underlies all its products to its installation procedures with its exclusive **Pro.fit** system, a range of carefully considered features designed to make fitting your kitchen as logical, quick and easy as possible.

That means your installers will take a fraction of the time they would with ordinary built-in products, saving you time and trouble on the day and ensuring that your appliances are securely and reliably installed over the years to come.

Time Saving

'Pro.Fit Support':

Whirlpool under-counter fridges and freezers can be installed up to 50% faster thanks to this handy tool which ensures perfect alignment of integrated furniture doors.

'Pro.Fit Door Fix': enables integrated furniture doors to be perfectly aligned automatically. Templates (on fully integrated fridges, freezers and dishwashers) show installers exactly where to fix the door without measuring.

'Pro.Fit Cut Out': Whirlpool dishwashers are specially shaped to allow gas or water pipes to run behind them. This saves the time cost and inconvenience of running long lengths of pipe around the appliance.

'Pro.Fit Handles':

Whirlpool ovens have carrying handles to make installation easier.

'Pro.Fit Ready Install':

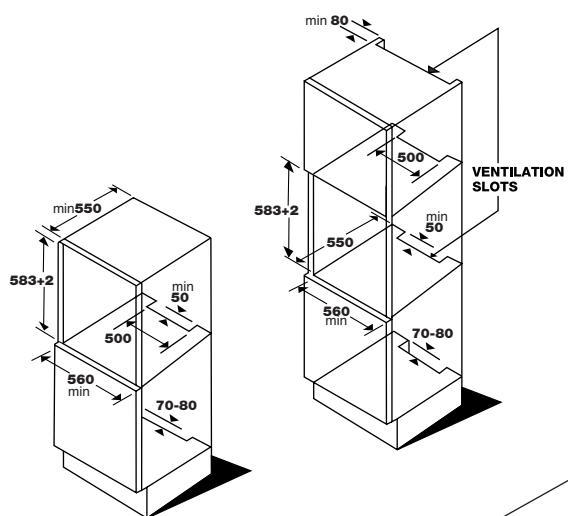

Whirlpool mini built-in microwaves fasten securely in place with a single screw which also ensures perfect lateral alignment.
